3. Information about the xMBA training / Certificate no. 25ABSS1591478/1

page 2 of 2

3.1 Goal of the training	The participants are prepared for working in a agile working environment and/or in startups. The xMBA teaches a variety of innovation and project management methods, practical expertise and enthusiasm for the digital world of work as part of an AI start-up simulation.	
3.2 Language of training	Due to the international backgrounds of the participants, the xMBA is held in German & English	
3.3 Duration	16 days spread over 4 weeks	
3.4 Methodology	In practical simulations, participants work in teams on real business scenarios under authentic market conditions. They go through all phases of company development - from the initial brainstorming and product development to market launch and scaling. The particular challenge lies in the high time pressure under which decisions are made and strategies developed. The learning process is supported by the use of state-of-the-art digital tools and apps that are also used in successful startups. Participants not only learn about these tools, but also actively use them to efficiently manage their projects, collaborate in teams and validate business ideas.	
3.5 Structure	14 modules with their diverse topics form the foundation of learning. Each module is designed in such a way that it can be embedded directly into the ongoing simulation. This means that the content taught in the morning is applied in practice shortly afterwards. This direct link between theory and practice, coupled with feedback from experienced lecturers, experts and the AI simulation, enables a particularly effective and sustainable learning process.	
3.6 Modules	1. Basics & megatrends 2. Design thinking & prototyping 3. Client experience & interviews 4. Agile project and working methods 5. Business modelling 6. Marketing & branding 7. Startup financing 8. Legal foundations 9. Cyber security 10. Tools & technology 11. Sales & pitching 12. Career portfolio 13. Startup ecosystem 14. Change management
